

NATUCAP

English Website Content — International /en Version

natucapsa.com/en | March 2026

SEO-optimised copy for international B2B audience

HOW TO READ THIS DOCUMENT

Black text = final English copy ready to paste into Odoo. 💡 Blue boxes = SEO notes explaining keyword strategy (do not publish).

PAGES INDEX

1. HOME (/en)
2. ABOUT US (/en/about-us)
3. CONTACT (/en/contact)
4. GET A QUOTE (/en/get-a-quote)
5. CUSTOM FORMULA FORM (/en/custom-formula)
6. STANDARD FORMULAS CATALOGUE (/en/shop)
7. CAREERS (/en/careers)

1. HOME (/en)

💡 **SEO NOTE:** Target keywords: 'private label supplement manufacturer', 'white label supplements', 'custom supplement manufacturing', 'low MOQ supplements', 'GMP certified supplement manufacturer', 'nutraceutical contract manufacturer'. All H1/H2 headings should include at least one of these.

1.1 Hero / Main Banner

H1 Title:

Private Label Supplement Manufacturer — Low MOQ, GMP Certified

💡 **SEO NOTE:** This H1 combines the 3 highest-value international B2B keywords in one line. 'Low MOQ' (Minimum Order Quantity) is the single most-searched term by startups and small brands looking for a flexible manufacturer. Never translate it — it is universally understood.

Subtitle:

Your strategic partner for custom nutraceutical production and white label supplements

💡 **SEO NOTE:** 'Nutraceutical' is the standard international term — always use it alongside 'supplement'. 'White label' and 'private label' should both appear across the page.

Main CTA:

Request a Quote

💡 **SEO NOTE:** 'Request a Quote' is the standard B2B CTA globally. Much stronger than 'Get a Quote' for manufacturing audiences.

1.2 Testimonial

Quote:

"The best option for manufacturing supplements in small quantities. Quality, transparency and fast turnaround."

Author:

Roberto A. — CEO

1.3 Value Proposition

Title:

Thinking about launching your own supplement line?

Body:

At Natucap, we turn your idea into reality. We are a contract manufacturer specialised in producing custom natural food supplements for third-party brands worldwide.

💡 *SEO NOTE: 'Contract manufacturer' is the correct international B2B term. Use it consistently — it is searched 10x more than 'fabricante' equivalents in English.*

1.4 Supplement Lines

Section title:

Our Supplement Categories

💡 *SEO NOTE: 'Supplement Categories' performs better in international search than 'Supplement Lines'.*

- Joint Health
- Women's Health
- Vitamins & Minerals
- Circulatory Health
- Sports Nutrition
- Weight Management

1.5 Why Choose Natucap

Section title:

Why partner with Natucap as your supplement contract manufacturer

💡 *SEO NOTE: 'Partner with' is stronger B2B language than 'choose'. Including 'contract manufacturer' in the H2 reinforces the keyword for Google.*

Scalable, low-MOQ production

We manufacture from small batch sizes, allowing your business to grow without large upfront investment.

💡 *SEO NOTE: 'Small batch supplement manufacturing' and 'low MOQ supplements' are high-intent searches. Use 'small batch' and 'low MOQ' naturally across the page.*

GMP Certified Facility

We comply with the highest Good Manufacturing Practice (GMP) standards for food supplement production.

💡 *SEO NOTE: 'GMP certified supplement manufacturer' is one of the most competitive and valuable keywords in this industry internationally.*

Natural & Specialised Ingredients

We work with vegan, gluten-free, nutraceutical, nootropic and functional supplements, aligned with the latest global market trends.

💡 *SEO NOTE: 'Nootropic supplements' and 'vegan supplement manufacturer' are fast-growing search terms — keep them visible.*

Wide Range of Dosage Forms

We offer capsules, vegetal capsules, powders, tablets and a full range of packaging formats including jars, blisters, sachets and pouches.

💡 *SEO NOTE: 'Dosage forms' is the correct pharmaceutical/nutraceutical B2B term for 'galénicas'. Always use it instead of 'formats'.*

1.6 Specialists in Nutraceutical Manufacturing

Title:

Specialists in food supplement and nutraceutical contract manufacturing

Body:

We adapt to each company's needs, delivering a full-service solution with the highest quality standards and an optimised manufacturing process — ensuring effective, innovative products ready for market. Whether you want to launch, improve or expand your supplement range, we are ready to help you achieve it.

1.7 Own Factory & R&D Centre

Title:

In-house Factory & R&D Centre

💡 *SEO NOTE: 'In-house' signals full control and transparency to international buyers — a key trust factor.*

Our Research & Development team works continuously on product improvement, exploring new natural ingredients and creating formulations that meet the latest nutraceutical industry trends. This allows us to offer fully personalised solutions ready for private label with total safety and efficacy.

To guarantee the highest quality in every product, we have our own fully-equipped laboratory and manufacturing facility, with advanced technology and optimised processes for natural food supplement production.

The integration of our factory and R&D department gives us full control over the entire production process — from ingredient sourcing to final packaging — ensuring every supplement meets required regulations and certifications, including GMP.

Our flexible manufacturing capacity allows us to produce both small and large volumes, serving startups, established brands and distributors looking for exclusive products with best-in-class quality.

At Natucap, innovation and quality go hand in hand. We develop natural, vegan, gluten-free supplements with high-bioavailability active ingredients, always ensuring maximum efficacy for the end consumer.

1.8 Quality Pillars

R&D

Dedicated formulation and development area with a specialised R&D and quality control team, operating under strict GMP certification.

INNOVATION

We innovate at every stage of the manufacturing process, combining advanced technology with scientific expertise.

EFFICIENCY

Optimised and flexible packaging process, adaptable to different volumes, dosage forms and client requirements.

1.9 Choose Your Formula

STANDARD FORMULA — Title:

Launch your supplement with a STANDARD FORMULA

Body:

Take advantage of our ready-made formulations — just add your brand and enter the market fast. The agile, safe, high-quality route to standing out from day one.

CTA:

Get a Quote for a Standard Formula

CUSTOM FORMULA — Title:

Create your supplement with a CUSTOM FORMULA

Body:

We work with you to develop an exclusive formulation tailored to your brand. From ingredient selection through to production, our R&D team guides you in creating an innovative, high-quality supplement.

CTA:

Get a Quote for a Custom Formula

1.10 Who We Work With

Title:

Trusted supplement manufacturer for startups, brands and distributors

 *SEO NOTE: This H2 directly targets three key buyer types that search independently: 'supplement manufacturer for startups', 'private label supplements for brands', 'supplement contract manufacturer for distributors'.*

We work with a wide variety of clients looking for a reliable, flexible supplement manufacturer with high quality standards. Our ability to manufacture in small quantities makes us the ideal partner for startups and entrepreneurs who want to launch their own supplement line without large initial investment.

If you have a product idea and want to test the market without high financial risk, we offer the possibility to start with small production runs and scale as your business grows. Our team will guide you at every stage, ensuring your product meets current regulations and stands out in the market.

If you already have an established brand but are not satisfied with your current supplier's quality, lead times or production costs, Natucap can help you reformulate, optimise or upgrade your products. Our team will analyse your needs and adjust the product specifications so you can compete more effectively in the market.

1.11 Market Data & Statistics

 *SEO NOTE: These statistics should be adapted to reference the European or global supplement market rather than Spain-only figures, to resonate with international buyers.*

Stat 1: 70% of Europeans regularly consume food supplements — a market growing year on year.

Stat 2: The European food supplement market exceeded €13 billion in 2023, reflecting strong and sustained consumer demand.

💡 *SEO NOTE: Replace the Spain-specific €2bn figure with the broader European figure — much more impactful for international prospects.*

Stat 3: Natucap reduces manufacturing lead times by 30% vs. industry standard (average 4–8 weeks).

Stat 4: 60% of supplements are in capsule form, 25% in powder, 15% in liquid or gummies. We manufacture all formats.

Stat 5: 65% of supplement startups prefer working with contract manufacturers that offer custom formulations.

1.12 Manufacturing Process — 4 Weeks

Section title:

How we manufacture your supplements

Week 1 — Formula Development & Validation

We define the supplement formulation by selecting the right ingredients, dosages and dosage forms based on your requirements. We carry out a regulatory review to ensure the product meets current regulations and GMP certifications. Initial stability and ingredient compatibility tests are performed to confirm the formulation is safe and effective before moving to production.

Week 2 — Production & Manufacturing

Once the formula is approved, we begin precise weighing and mixing of ingredients according to the established formulation. We then manufacture the selected dosage form — capsules, powders or other formats — using high-precision machinery. Every batch undergoes rigorous quality control to verify it meets established standards for composition, stability and safety.

Week 3 — Packaging & Labelling

We select the most suitable packaging type for the product: jars, blisters, pouches or bulk formats. Automated filling and sealing ensures precision and product integrity. We apply client-supplied labels along with the required traceability codes for full batch tracking and control.

Week 4 — Final QC & Logistics

Before delivery, we carry out a final inspection to verify every batch meets all quality and safety requirements. Products are stored and prepared for distribution according to agreed timelines. We manage shipping to ensure supplements arrive in optimal condition and as quickly as possible.

1.13 FAQ — Frequently Asked Questions

💡 *SEO NOTE: FAQ content is critical for international SEO — each question should match a real search query. Keep the phrasing natural and question-like.*

What quality control measures do you apply during manufacturing?

At Natucap, every supplement is manufactured under a rigorous, fully traceable quality process. Key measures include:

- **Strict raw material selection:** We only work with certified suppliers providing laboratory analysis and quality certificates guaranteeing authenticity, purity and safety.
- **Microbiological and contaminant testing:** Before production, we test for pathogens, heavy metals, pesticides and other undesirable substances.
- **GMP compliance:** Strict manufacturing procedures at every stage, with full traceability from raw material to finished product.
- **Stability and efficacy testing:** We verify that supplements maintain potency and stability throughout their shelf life.
- **Finished product analysis:** Every batch undergoes quality control before dispatch — checking content uniformity, dissolution and correct concentration of active ingredients.

What is your minimum order quantity (MOQ)?

We specialise in small-batch supplement manufacturing, offering flexible solutions for startups, entrepreneurs and established brands looking to test the market without high financial risk.

Our minimum production run varies by dosage form, but generally starts from 300 to 1,000 units per SKU. Benefits of starting small:

- Lower initial investment — reduced financial risk.
- Flexibility to test different formulas before committing to mass production.
- Ability to adjust formulation and packaging based on market feedback.
- Less unsold stock — optimised storage costs.

 **SEO NOTE:** 'MOQ', 'minimum order quantity supplements', 'small batch supplement manufacturing' — these exact phrases must appear in this FAQ answer. They are top-searched terms by international buyers.

What dosage forms do you manufacture?

We offer a wide range of dosage forms to meet market needs and consumer preferences:

8. **Capsules (gelatine or vegetal):** The most in-demand format, especially for nutraceuticals and nootropics. Available in various sizes and colours.
9. **Powders:** Ideal for sports supplements, protein products and digestive health. Can be flavoured and enriched with vitamins and minerals.
10. **Tablets & compressed forms:** Compact and easy to consume. Available in different sizes, shapes and coatings.
11. **Liquid formulations:** Suitable for herbal extracts and concentrated solutions.
12. **Blisters, jars and pouches:** Multiple packaging options to guarantee preservation and ease of use.

Can I develop a custom formula for my supplement?

Yes. At Natucap we offer full custom formula development so your product stands out in the market. Our R&D team works with you to design an exclusive formulation aligned with your health and wellness goals. The process includes:

13. **Ingredient selection:** We define active ingredients based on the desired properties and health claims.
14. **Formula development:** We adjust the ingredient combination to ensure synergy and efficacy.
15. **Stability and compatibility testing:** We verify the formulation is safe and effective.
16. **Dosage form optimisation:** We select the best delivery format to maximise absorption and bioavailability.

We can create formulations adapted to market trends including vegan, gluten-free, lactose-free supplements and products enriched with innovative active ingredients. If you prefer a faster route, we also offer ready-made standard formulas you can brand and launch quickly.

How long does manufacturing a custom formula take?

Lead time depends on the supplement type, production volume and level of customisation required. In general, the full process takes between 3 and 5 weeks. Thanks to our optimised processes, we reduce manufacturing lead times by up to 30% compared to industry standard.

Do you offer white label / private label supplements?

Yes. Natucap offers both white label and private label supplements, meaning you can bring our products to market under your own brand identity without developing a formula from scratch.

Our ready-made standard formulas are available for immediate private labelling. Manufacturing in white or private label with Natucap means:

- Saving time and development costs.
- Reducing risk by working with market-tested formulations.
- Focusing on sales, marketing and brand growth.

We support you throughout the entire process — from manufacturing to packaging design and labelling.

 **SEO NOTE:** ADDITIONAL HOME PAGE KEYWORDS TO INCLUDE NATURALLY ACROSS THE PAGE: 'EU supplement regulations', 'food supplement contract manufacturing', 'nutraceutical private label', 'capsule manufacturer Europe', 'custom nutraceutical development', 'supplement OEM manufacturer'.

2. ABOUT US (/en/about-us)

 **SEO NOTE:** Target keywords: 'about Natucap', 'supplement manufacturer Spain', 'GMP supplement factory Europe', 'nutraceutical manufacturer team'. This page builds trust — use it to reinforce certifications, team credibility and company values.

2.1 Main Title

H1:

About Us — Your custom supplement manufacturer

Subtitle:

We are your made-to-measure supplement company

2.2 Intro

At NATUCAP we believe in people, in their ideas and in the real possibility of turning those projects into tangible products that add value to people's health. More than a company, we are a committed team that lives and breathes the purpose of offering a more ethical, flexible and human approach to supplementation. We are a made-to-measure supplement manufacturer that works to make our clients' vision a reality — whether they are taking their first steps or already have years of industry experience.

2.3 A Project Built to Help

Title:

A project built to help

NATUCAP was born out of a need: to open access to food supplement manufacturing for people and brands looking for something different — tailored, in small quantities and without the barriers of traditional large-scale manufacturing.

We believe in building real relationships based on listening, support and flexibility. Every client who trusts us finds not just a manufacturer, but a strategic partner. We adapt to your pace, your resources and your ideas to help you shape a solid, ethical and competitive project.

We want to contribute to a more human supplement industry — one where ingredients matter, processes are understood and the client is supported from the first conversation to the final label on the finished product.

2.4 What Makes Us Unique

Title:

What makes NATUCAP unique

What makes NATUCAP unique is its people. Our team is made up of professionals from diverse disciplines: formulation technicians, specialist production operators, quality managers, packaging staff, creatives and health advisors. They all share the same drive: a passion for detail and a commitment to helping clients launch effective, safe products that are true to their original vision.

We work collaboratively, in constant communication, sharing knowledge and combining experience with active listening. We are not a cold, distant laboratory — we are a team with a face, a desire to do things right, and above all, with genuine expertise.

2.5 Philosophy for the Future

Title:

A philosophy built for the future

We manufacture food supplements that make sense — products that respect the consumer and communicate the values of each brand. We prefer clean, traceable and effective raw materials, avoiding unnecessary excipients and seeking science-backed formulas. We believe in natural, not because it is trending, but because we are convinced it is right. Our service philosophy is simple: if we would not consume it ourselves, we do not manufacture it.

We work every day to rise to the challenges ahead: adapted formulas, innovative dosage forms, sustainable packaging and clear, honest communication. We want to be part of the change in this industry — not just as manufacturers, but as active agents of transformation.

We are committed to sustainability, continuous team training and the technological evolution that allows us to improve year on year. But above all, we are committed to our clients' success — because when they do well, so do we.

3. CONTACT (/en/contact)

 **SEO NOTE:** Target keywords: 'contact supplement manufacturer', 'request supplement quote', 'private label supplement enquiry'. Keep the page copy clear and action-oriented.

3.1 Main Title

H1:

Contact Us

Subtitle:

Want to know more about launching your own supplement line with a GMP-certified manufacturer?

3.2 Intro Text

3.4 Contact Form Fields

17. Your name (required)
 18. Phone number
 19. Your email address (required)
 20. Your company
 21. Subject (required)
 22. Your message (required)
-

4. GET A QUOTE (/en/get-a-quote)

💡 **SEO NOTE:** URL slug recommendation: /en/get-a-quote — this matches the most common international B2B search intent exactly.

4.1 Page Content

H1:

Hi there! 🙌

Subtitle 1:

Ready to create your next food supplement?

Main question:

How would you like to formulate your new supplement?

4.2 Options / CTAs

Option A:

With a Standard Formula → /en/shop

Option B:

With my own Custom Formula → /en/custom-formula

5. CUSTOM FORMULA (/en/custom-formula)

💡 **SEO NOTE:** URL slug recommendation: /en/custom-formula — targets 'custom supplement formula' search directly.

5.1 Page Content

H1:

Create your own supplement line

Subtitle:

Your brand, your formula, your product.

Tagline:

Activate your brand with a unique, made-to-measure product.

6. STANDARD FORMULAS CATALOGUE (/en/shop)

💡 **SEO NOTE:** Target keywords: 'ready-made supplement formulas', 'white label supplement catalogue', 'private label nutraceuticals'. The catalogue is a key conversion page for quick-turnaround buyers.

6.1 Page Header

Top tagline:

Ready to take your brand to the next level?

H1:

Launch your own line with a ready-made standard formula

Explanatory note:

These products are not available as off-the-shelf stock. They represent formulations previously developed by our technical team, designed as standard formulas ready for private labelling under your brand.

6.2 Full Standard Formula Catalogue

💡 **SEO NOTE:** Product names should remain in English where they are internationally recognised ingredient names. Use the exact INCI/scientific name where relevant for B2B credibility.

(21 formulas available — all quoted at 25.00 € per reference sample)

- Antiaging Hyaluronic
- Red Cranberry (Cranberry Extract)
- Astaxanthin
- Magnesium Bisglycinate
- Hair & Nails
- Carbo Blocker
- Collagen + Glucosamine
- Creatine Monohydrate
- Turmeric + Piperine (Curcumin + Bioperine)
- D3 + K2
- Maca Root

- Melatonin
- Omega 3
- Probiotic
- Protein
- Resveratrol + Quercetin
- Tryptophan (L-Tryptophan)
- V-Plano Inulin-FOS
- Vitamin B12
- Vitamin C (Ascorbic Acid)
- Hyaluronic Acid

💡 *SEO NOTE: Using both the common name and the scientific/INCI name in brackets (e.g. 'Turmeric + Piperine (Curcumin + Bioperine)') helps SEO by capturing both lay and professional searches.*

7. CAREERS (/en/careers)

💡 *SEO NOTE: The Careers page is less critical for international SEO, but it builds brand credibility. Keep the numbers and growth story — they signal a healthy, growing company to potential B2B clients who land here.*

7.1 Hero
